Art Unit: 1771

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3, 6-9, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3 and 8, the formation of interlayer coating between the diamond and the non-metallic framework material substrate renders the claims indefinite because the independent claims 1 and 6 from which claims 3 and 8 depend respectively recite that the diamond is in direct contact with the non-metallic framework material substrate. It seems that the limitations in claims 3 and 8 are contradictory to the recitations from claims 1 and 6 respectively.

In Claim 6, line 3, the term "the material" should be changed to the foam substrate because it is unclear that the material is the non-metallic open-cell foam substrate or other than the foam substrate.

Claim 7 and 8 recite the limitation "framework material" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Withdrawal of Finality

3. Applicant's request for reconsideration of the finality of the rejection of the last Office action mailed on 04/09/2003 is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

Application/Control Number: 09/708,100

Art Unit: 1771

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1, 2, and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cho (US 4,944,772) in view of Bovenkerk et al (US 4,288,248). Cho teaches a production of supported polycrystalline abrasive compact comprising a porous polycrystalline diamond compact 26, an intermediate diamond layer 28 having a thickness of 30 to 500 microns, and a carbide support 24 (figure 3). Cho teaches the porous polycrystalline diamond compact having been disclosed in US 4,288,248 (column 5, lines 9-11). US 4,288,248 to Bovenkerk discloses a porous polycrystalline diamond compact defined a substantially continuous interconnected network of pores, dispersed throughout the compact. Bovenkerk further teaches the network of pores runs throughout the diamond layer and most are less than a micron in diameter. This indicates that the acid penetrated the entire diamond layer and acted to remove the metallic phase substantially uniform throughout (column 4, lines 60-68). The acid is able to flow through the pore structure to remove the infiltrant in the compact. Likewise, it is clearly apparent the porous polycrystalline diamond compact must have a porous construction to allow the flow of fluids in at least one direction through the compact. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the porous polycrystalline diamond compact having a substantially continuous interconnected

Application/Control Number: 09/708,100

Art Unit: 1771

network of pores because such is the typical feature of the porous polycrystalline diamond compact material and Bovenkerk provides the necessary details to practice the invention of Cho.

Response to Arguments

- 6. Applicant's arguments with respect to claims 1, 2 and 4 have been considered but are most in view of the new ground(s) of rejection.
- 7. The art rejections over Jury have been overcome by the present amendment with respect to claims 1, 2, 4, 6, 7, 9, and 11.

Allowable Subject Matter

- 8. Claims 6, 7, 9 and 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
- 9. Claims 28-30 are allowed. None of the prior art teaches or suggests an article comprising diamond directly deposited on a non-metallic open cell foam substrate having a porosity sufficient to permit the flow of fluids in at least one direction through the foam substrate. Further, none of the prior art teaches or suggests an article comprising diamond directly deposited on a non-metallic framework material substrate having a porosity sufficient to permit the flow of fluids in at least one direction through the foam substrate, wherein the diamond is fully coalesced.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Application/Control Number: 09/708,100

Art Unit: 1771

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai Vo whose telephone number is (703) 605-4426.
The examiner can normally be reached on Tue-Fri, 8:30-6:00 and on alternating Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (703) 308-2414. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
